### Compatibility of Lenses, Roll Film Holders and Camera Bodies

- \* Lenses of the conventional GX series, though not equipped with shot counters, can be used with camera models GX680 III and GX680 III S.
- \* The new GX M series lenses are compatible with camera models GX680 and GX680 II, but their individual shot counters will not function.
- \* Conventional roll film holders and film cassettes are usable with the new GX680 III and GX680 III S cameras, but do not provide the new film holder features (multi-format, barcode scanning etc.).
